

Flow test Ferrari Fuel Distributor

To check the quality of your Ferrari fuel distributor you can measure the flow on each port of your fuel distributor. When you have an older Ferrari the fuel system gets clogged up. If you have a Ferrari with a K Jetronic fuel distributor the flow of each port in the time should be equal. Check your Work Shop Manual for the flow figures. If you don't have a Workshop Manual send a mail to info@ferrari400parts.com. You can find the 400 i manual and K Jetronic books on the CD in the box.

Test 1

First attach to each port of your fuel distributor one tube. You can use the existing banjo bolts M8 * 1 thread to attach the fuel flow meter. Use copper rings to prevent fuel leakages.

Attached fuel flow meter
